DETAILED ACTION

1. The Applicants' preliminary amendment filed May 5, 2006 is acknowledged. Claims 1-6 are deleted. Claims 6-16 are added. Now, Claims 6-16 are pending.

Claim Objections

2. Claims 6-16 are objected to because of the following informalities:

In Claim 6 (6th line from bottom), should "is reacted" be removed?

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka (US 4 617 344).

For Claims 6-9, Tanaka discloses a process for the preparation of phosphonic ester-modified organosiloxanes by reacting a) an organosilicon compound, b) a phosphonate ester-modified alkoxysilane represented by formula (II) and c) a catalyst. (col. 1, line 53 to col. 2, line 21, col. 2, line 26 to col. 4, line 4 and col. 4, lines 31-51) For Claims 10-12, the reaction temperature is illustrated in Examples.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka.

Tanaka discloses a process for the preparation of phosphonic ester-modified organosiloxanes, *supra*, which is incorporated herein by reference. Tanaka is silent on the type of gas atmosphere in which the reaction is performed. However, it

would have been obvious to one of ordinary skill in the art to carry out the reaction in a gas atmosphere that is inert to the reaction.

7. The "X" references cited in the international search report are not relied upon because of the following reason:

US 2 768 193 does not teach or fairly suggest the silicon compound of formula [IV] containing hydroxyl group(s) as set forth in the present claimed invention.
